

TEMPUR ERGO™ SMART BASE

INTRODUCING OUR SMARTEST BED EVER

The TEMPUR Ergo™ Smart Base is powered by integrated Sleeptracker®-AI sensors. The innovative adjustable bed system automatically detects and responds to micro-vibrations from snoring – all night. And while you're awake, you can easily find your most comfortable position for relaxing, reading or even our Zero-G position providing a feeling of weightlessness – all at the touch of a button.

It also shares sleep analysis and insights with you over time through an easy-to-use app. Offering you expert-level sleep coaching uniquely tailored to you. You can even connect your TEMPUR Ergo™ Smart Base with your Amazon Alexa devices, to use simple voice commands for many functions.

All this while ensuring complete privacy and security with no microphones or recorded sounds.

THE SMART RESPONSE TO SNORING

The all-new TEMPUR Ergo™ Smart Base utilises integrated Sleeptracker®-AI sensors (without microphones) to detect you and your partner's micro-vibrations from snoring. If snoring is detected, the bed automatically responds, elevating your upper body 12 degrees – a position to help reduce snoring.

Experience your most restful sleep ever, with the smart response to snoring.

TEMPUR ERGO™ SMART BASE

PERSONALISED SLEEP IN THE PALM OF YOUR HAND

Discover the power of intelligent sleep technology and advanced and accurate analytics. The TEMPUR Ergo™ Smart Base provides personalised insights based on your sleep with customised coaching in an easy-to-use app. The TEMPUR Ergo™ Smart Base summarises every night with a Sleep Quality Metric, along with a comprehensive picture of different sleep phases. It then provides sleep strategies to help you get more out of your sleep.

DAILY SLEEP SCORE

Each morning, you'll wake up to a personalised sleep report that will help you understand your stages of light sleep, deep sleep and REM, and potentially time spent awake.

SLEEP INSIGHTS

Having a nightly Sleep Quality Metric makes it easy to see at a glance if you are trending toward better sleep over time. The app reports the nightly score to you the next day and shows you how it compares to previous nights from the previous week, month or year.

SMART ALARM

The TEMPUR® Sleeptracker® app features a smart wake-up alarm designed to trigger when your lightest phase of sleep has been identified. When using a TEMPUR Ergo™ Smart Base, the smart alarm feature offers your choice of wake-up music or vibrations to be set within a selected window of time.

Three ways to download:

1. Follow the QR code from the "Let's get started" card.
2. Go to sleeptracker.com/getapp/tempur.
3. Install TEMPUR® Sleeptracker® from Apple App Store or Google Play.

TEMPUR® SLEEPTRACKER® APP

To enjoy the benefits of our advanced smart bases, download the companion app TEMPUR® Sleeptracker®. The app is available in iOS and Android and can be found in the Apple App Store and Google Play.

LIFESTYLE ADJUSTABILITY AND ZERO-G BENEFIT

The TEMPUR Ergo™ Smart Base uses advanced technology to suit your lifestyle when you are awake. It is fully adjustable, elevating your comfort so you can find your most suitable position in bed for relaxing, reading or watching TV – all at the touch of a button.

By gently elevating your legs, the TEMPUR® Zero-G preset is designed to help simulate circulation throughout your body, providing an experience of complete weightless relaxation that will leave you feeling refreshed and rejuvenated.

SLEEP SMART WITH A BED CONNECTED TO YOUR HOME

Compatible with Amazon Alexa, the TEMPUR Ergo™ Smart Base helps you start and end each day right. You can adjust the position of your bed, receive your daily sleep report and hear customised sleep tips. Lie back and enjoy personalised sleep insights and smart home compatibility thanks to voice control integrated into your TEMPUR Ergo™ Smart Base.
