Important notice:

The supplied fastening material (dowels and screws) is intended only for assembly of components to concrete or solid masonry walls. When assembling components to a wall please always adhere to the max. load values. The nature of the designated wall is ideally enquired during the order process and checked again before assembly by the assembly technicians. If the structure of the wall is deviating from solid structure (e.g. lightweight walls) a different, suitable attachment method is imperative. Clarify all electrical conditions for connection and device technology upfront. Freely hanging lightings need a solution with a duct channel on or below plaster.
